It's better to be feared than loved ...

Never appeal to love or honesty when working on the internet. Human nature is what it is. Always appeal to base desires such as greed, fear, sex, jealousy. These are what I call prime movers. They are the psychological elements you'll pay attention on. That's all I'm going to say about psychology, because that's all you need to know.

Most internet marketers make the big mistake of trying to learn so much that they become overwhelmed by all the opportunities available. Instead of focusing on one money-making method, they dabble with dozens of them. This is no good. You need to laser focus on one particular technique, use trial and error and refine your strategy until you make it work, then move on to the next.

One important advice ... Internet marketing is a ruthless art. Play nice and they'll eat you alive. In this business, you're either a wolf or a sheep. Welcome to the jungle and good luck out there ...

Maybe you've heard the phrase "the money is in the list"? Believe it.

Some time ago, the basic idea was brutally simple; you send out hundreds of thousands (millions .. billions?) of emails promoting a wide range of affiliate products, sit back and collect your commissions.

WRONG!

The days of promoting affiliate products spamming by email are long over. The US Can-Spam Act makes that illegal. Lucky for us email marketers, free offers do better than others. After all, everyone wants to get something for free. In case I've lost you, when I refer to a free offer I mean you get surfer's email address when you direct a surfer to a page where they fill in some required piece of information (perform the "action") rather than fill out an order form to buy something.

An example of a free offer might be a squeeze page for lose weight e-book which doesn't actually sell the e-book, just captures the customer's email for future marketing, and gives a surfer promised e-book. Let's take a look at the steps involved in playing the email marketing game on

RIGHT WAY!

The thing I love about this method is that it has recurring commission all over the system. This can be done with free traffic but in this guide I'll be explaining a paid version which requires at least \$30 to get started. I Do recommend you try this with \$100 for the best results!

I've had plenty of time to test landing page builders over the last few years and now it's time to put the two biggest to the test!

I've created multiple businesses online and one of these two stands out when it comes to an all in one online business builder.

Can you guess what one? Don't worry I'll tell you soon!

It's simple really, I test everything and I'm a simple man who likes things that just work and make me money.... That's not too much to ask right?

Let's get down to business with [Clickfunnels](#) review, oh and LeadPages

CLICKFUNNELS

LEADPAGES

Are you an online marketer selling physical products or virtual goods?

If you love doing webinars and selling digital goods this is the platform for you. Well, actually whatever you want to do online ClickFunnels can work for you from collecting leads to creating an entire online business.

With the ability to have everything in one platform this really is and all in one online business software.

CLICKFUNNELS

LEADPAGES

Looking for fully customizable landing pages to direct traffic and increase conversions?

Leadpages is a dedicated landing page platform focused on delivering results to your marketing campaigns. Leadpages is good but the problem is that's really all it is... a Landing page builder.

When you compare it to Clickfunnels like I'm about to do you will see what one fits your needs.

What's ClickFunnels?

[ClickFunnel](#) was designed by Russell Brunson and he's generated millions online using his own software.

ClickFunnels is an all-in-one sales funnel software that provides you with a shopping cart, email service, autoresponder and much more.

It's one of the most powerful funnel solutions on the market, right now.

With ClickFunnels, you can do a lot more with your landing page. Consider it a marketing page that allows you to have complete control over the desired outcome (i.e. boosting conversion or increasing sales).

The great thing about ClickFunnels is that you can connect your email marketing into their system and take advantage of their autoresponder for follow ups and newsletter emails.

This saves you money because then you don't have to use services like MailChimp or Aweber, you can keep it all together and manage it.

This headline on their website says it all right?

"Have You Ever Felt Handcuffed As An Entrepreneur...

Or Just Can't Seem To Put All The Right Pieces Together?"

That's exactly what ClickFunnels is about.

Helping struggling entrepreneurs all the way up to expert entrepreneurs and anyone in between!

What ClickFunnels Is All About

[ClickFunnels](#) use a simple drag and drop editor allowing you to set up a landing page or sales page exactly as you want it. If you don't want to use their templates, you can design a page entirely on your own.

Now, this is where ClickFunnels sets themselves apart and becomes the ultimate go to service online business owners or entrepreneurs as we sometimes call our selves.

Analytics

ClickFunnels allows you to incorporate your retargeting and tracking code into your pages.

They provide you with all the details about your pages and visitors so you can learn how well they perform.

Analytics are important but there are lots of other important features this ClickFunnels review is about to lay out for you.

Shopping Cart

Are you using Shopify or another online e-commerce shopping cart? With ClickFunnels, you don't have to.

ClickFunnels allows you to track and generate sales directly from the pages you create.

Tracking customers, sending follow up emails, upsell notifications, can all be managed and controlled here.

This is by far one of the best features!

This saves you having to use sites like ClickBank and Zaxaa that cost you more.

You can integrate Stripe as well and that's free!

Memberships

With Clickfunnels membership sites you can create courses!

You can jump in and create your own course and start selling it by using some of the other features they offer.

This is something I love because I can have everything in one software, I don't need to use other platforms for my memberships.

Backpack

I just love this feature!

This feature is uniquely offered by ClickFunnels and it is the reason why they stand out when it comes to sales funnel solutions.

If you're reading this ClickFunnel review this is something you will love about the platform!

If you're an affiliate marketer, using ClickFunnels' Backpack affiliate marketing management platform allows you to monitor your affiliate network.

Let's say you have a product or service. Instead of spending large amounts of money on copywriting and advertising, you can set up your own affiliate marketing system.

Affiliate marketing is a performance based style of marketing where you pay a commission based on every sale made of your product or service.

ClickFunnels makes this easy to track with Backpack. This tool makes it easy to setup your affiliate program and integrates within your funnel and email automation.

Using Backpack is a great way to save your marketing budget while effectively promoting your products and services.

ClickFunnels did a video explaining how to set this up.

<https://www.youtube.com/watch?v=txODLb89i34>

ClickFunnels Actionetics

If you're using ClickFunnels you can integrate your email marketing programs or ditch them altogether.

Actionetics is ClickFunnels email marketing tool. This is a smart piece of software that you can use to create and send automated emails.

It also has the ability to act and react based on certain actions taken in your funnels.

However, it's not designed for email alone and can be integrated with Twilio to send SMS.

Actionetics allows you to communicate your business with an array of features that connect you to your target audience.

PURCHASED AT BUYSSELLMETHODS.COM

BUY OR SELL EARNING METHODS

Using Actionetics allows you to cut back on the amount of 3rd party services by concentrating your efforts on one. (saving you money)

ClickFunnels makes importing your contacts seamless and setting up autoresponders can be done in a few clicks.

Once you have crafted your email autoresponder, you can put them to work right away.

In addition to having multiple email templates, you can also design a fully custom email and personalize them for specific purposes.

Who's Behind ClickFunnels?

Here's what you need to know about ClickFunnels. This company was developed by Russell Brunson and an incredible team of designers.

Now I know I mentioned this at the start but...

Russell has been selling online since his earlier college years where he uncovered and profited from various online selling techniques.

He's sold millions of dollars worth of services and products from his basement and his company.

ClickFunnels makes use of the sales funnels methods he has mastered and used repeatedly to deliver his online success.

I don't know about you but I would rather use a software that's backed by someone who actually makes million from using it himself.

He looks like a fun guy right? Now in this review, I don't want to use Russell as an object to make up your mind on what platform you should use.

Now one of the best features of this entire platform is that fact that it's so easy to create the pages and connect all the dots. I really wanted to highlight this inside the review.

With a comprehensive database of premade templates, it makes it super easy to get started and set up pages within minutes.

They also have a marketplace where you can get free or paid templates off other users.

Don't worry the ClickFunnels software comes with a HUGE variety of templates already built in for free.

What's LeadPages?

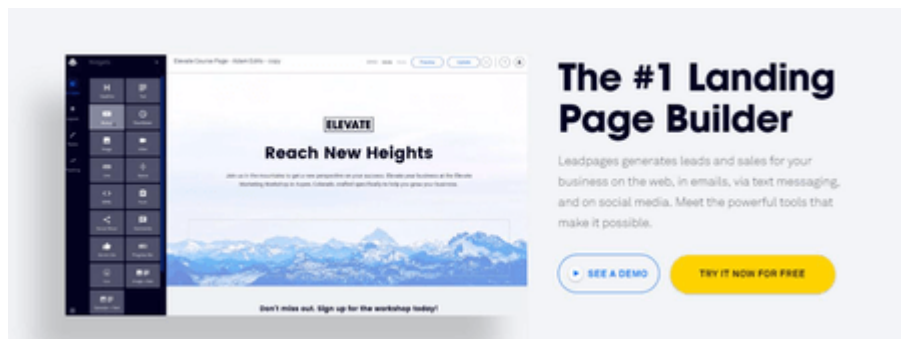

LeadPages is a fully customizable landing page builder dedicated toward capturing emails.

With Leadpages, you can design a page any way you want using the templates they provide.

You can set up webinars, email collection, lead magnets, squeeze pages, and thank you pages.

If you are using other services for your email marketing, you can integrate them with your Leadpages.

Overall, the primary focus of LeadPages allows you to collect emails. They have recently partnered with some companies like Stripe to incorporate sales being made directly from the page.

LeadPages Features

Leadpages is an introductory level service for business owners to start collecting contacts for those who may be interested in their products and services. Here are a few of the features of Leadpages:

Sending Lead Magnets

Lead magnets are a form of digital giveaway (i.e. an ebook, coupon, video, or free seminar) that can be accessed by someone once they provide their email.

You can set up a landing page with Leadpages using a subscriber box or opt-in box.

Once you collect the email, the link to your content or offer will be provided (through your email service provider or a thank you page).

Sales Pages

There are 350+ templates to choose from and you can use them to design your own sales pages.

Use these to create long sales pages detailing the features and benefits of your product or service. Sales pages are great for closing a deal and processing a sale transaction.

Squeeze Pages

A squeeze page is used to get a prospective customer to take a specific action like registering, signing up, or even buying something.

These pages provide a piece of content (i.e. a YouTube video or text) and a desired action.

Thank You Pages

Thank you pages are a common courtesy after someone has signed up or purchased a product.

You can also incorporate an upsell to capture a customer's committed, buy-in mentality.

Leadpages has templates that can direct new customers to a new squeeze page or landing page and generate more revenue.

Pop-up Sign-up

If you're looking for a smart way to capture a lead, pop ups are the way to do it.

You can create this on an existing content page and set a trigger using a link or graphic on your page.

A/B Testing

Having the ability to test variations of your pages allows you to optimize your efforts and increase returns.

Changing text, colors, images, font size and more could be the micro tweaks needed to bring a boost in performance.

Leadpages allows you to test these variations and serves different versions to visitors while tracking it all.

(Page Design) ClickFunnels Vs LeadPages

Leadpages has been a longstanding leader as a landing page provider. Their templates are well recognized and used by many marketers across the web.

ClickFunnels is a new player in the field. They are backed by the marketing powerhouses of Russell Bronson and with their innovative approach and all-in-one capabilities, it wouldn't be a surprise if ClickFunnels soon dominated the market.

ClickFunnel Page Design

ClickFunnel offers you the ability not just to use templates, but also to build an entire page from scratch.

The templates provided by ClickFunnels allow you to make squeeze (opt-in) pages, sales pages, webinar pages and membership pages.

It includes a few clever editor functions like their drag and drop function.

You can design FAQ elements, styled list elements and more. They have a wide range of styling options so you can ensure your brand and image is recognized.

Here's a feature that is often lacking in many funnel builders and that's customization of the email capture form. When building your funnels it's important to have a range of capture pages.

You get complete control over the optin style of the form.

After getting set up, you can browse through their top converting pages and quickly set one up for your products or services.

LeadPages Page Design

Leadpages have been the main provider of landing pages on the web. They have sure proof templates and they continually update their database with more pages all the time.

They have a good range of templates and they continually update their database with more pages all the time.

You can sort them based on conversion rates too.

Leadpages also uses a drag and drop page builder with HTML design capability. What it lacks though is the ability to add a shopping cart or an automated email response (you'll need a third party to perform that one).

What it lacks though is the ability to add a shopping cart or an automated email response (you'll need a third party to perform that one).

There are a few things to point out about the design capabilities of ClickFunnels and Leadpages.

With ClickFunnels, you only have access to a certain amount of pages and funnels if you start at the \$97 per month plan.

If you went with Leadpages, you get complete access to all their templates at \$37 per month.

But there is a catch... If you use LeadPages you need 3rd party apps and they can cost you well over \$200 extra a month depending on what ones you use.

Ease of Page Editing

Even though LeadPages are constantly updating their landing page templates, they are still being used over and over again.

When certain designs start to saturate the marketplace, the common folk will be quick to figure out what this is, yet another, opt in trying to squeeze a sale.

Conversion rates will start to drop.

Without any question, templates have their place but ClickFunnels provides you with complete creative control.

If you're looking to stand out and perhaps design an original and high converting page, ClickFunnels is the way to go.

You can use one of their templates as a base and use their editing tools to make some extensive changes to meet your exact needs.

With ClickFunnels, you can add taglines, popups, copy, video, optins, testimonials, footers and more.

Keep in mind that the entire design which includes the color and style can be completely customized.

Using the platforms gives you the opportunity to set yourself apart if you're in an increasingly crowded niche with pages being built on the fly to capture a lead and generate a sale.

Who Has The Best Support?

When you're new to a platform, having the right support available makes setup easy and the learning curve small.

Here are the big differences in support provided by both ClickFunnels and LeadPages.

When you're starting with ClickFunnels, you have access to regular email support. If you're looking for something more, like phone support or priority template requests, that is only provided to Enterprise members.

One thing ClickFunnels is a HUGE facebook where you can ask for help. LeadPages doesn't.

Leadpages offer a little more support than ClickFunnels.

If you get their standard plan you receive email support, their pro plan provides live chat and the advanced plan receive all this and phone support (as well as a 1-on-1 call to get started).

However, something to note is that the live chat is only available if you sign up to the more expensive yearly plans. If you're paying month to month, you'll have email support, much like ClickFunnels.

Traffic

We are going to use solo ads with udimi.com to get very targeted instant traffic. There are many solo ad sites. [Udimi](https://udimi.com) sadly doesn't have many niches available but it has some, and the quality is very good.

A Solo ad is basically you creating an email with a **link** in it, and giving that email to an internet marketer **who already has a big list with thousands of subscribers** that are around your niche, and the internet marketer will send your email to his big targeted list.

In solo ads you usually buy clicks-meaning that you are going to find someone (a solo ad seller) to give him an email (email-swipe is the same thing) to send to his list and you are going to pay him according to high much clicks you want your link in your email/swipe to get.

So if you want to give him an email to send to his list and want your link in your email/swipe to get 100 clicks, you pay him for 100 clicks. You basically pay him per click.

Solo ads are great because you can find solo ad sellers that have a big list of subscribers who are already interested in your niche, so you get targeted traffic.

You will see a long list of sellers that are about that niche.

There are upvotes and down votes on each seller. The upvotes is a positive review that people gave because they got the clicks (traffic) they order for.

The people who down voted the seller are the ones that they didn't get as many clicks as they order. So you have to find sellers that will deliver your traffic.

The screenshot shows the Lidiimi website interface. On the left is a navigation menu with links: MY SOLOS, MESSAGES, AD TEXTS, MONEY, SETTINGS, EXTRAS, and GET PROBE. The main content area displays a list of sellers, each with a profile picture, name, and a brief description of their services. The sellers listed are Sally Fields, Fabian Tan, Mark Jameson, Philip Coble, Andy Steele, and Angela Wong. Each seller's entry includes their price (e.g., 45¢, 50¢, 55¢), a rating (e.g., 0.25%, 0.45%, 0.55%), and the number of upvotes and downvotes (e.g., 1229 upvotes, 17 downvotes for Sally Fields). The website also features a top navigation bar with links: FIND SELLERS, SOLO DEALS, AFFILIATES, FORUM, and HELP.

Step 4. Order how many clicks you want

So find a select, click on him, then select how many clicks you want to order from him.

Select the email swipe that you have previously written.

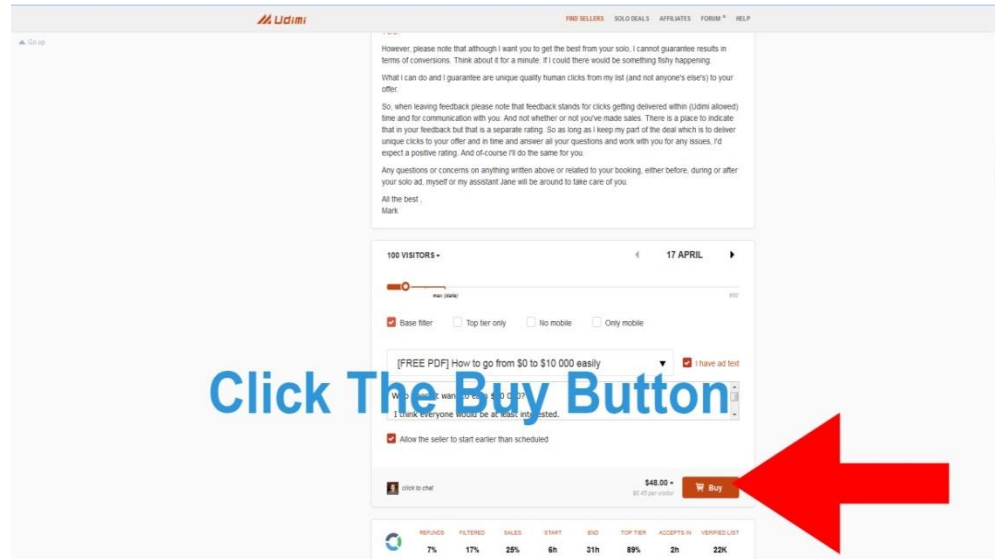

Then click "ad to cart". You can pay with paypal.

They must not have a negative vote.

Now we must find solo ad sellers that have no downvotes/negative votes, not a single one.

No negative votes, only positives

Seller Name	Rating	Positive Votes	Negative Votes	Status
Andy Steele	4.9%	148	0	✓
Mark Jameson	4.5%	2581	18	✗
Philip Coble	4.5%	175	1	✗
Filip Holmen	4.9%	94	0	✓
Jonathan Soh	4.5%	221	4	✗
Fredrik Forsman	4.5%	292	1	✗
Harris Abu Bakar	5.0%			

The sellers that have negative votes don't interest us because they don't have 100% success rate, which means that not all people that ordered from them received the quality of traffic they were expecting or at least the number of clicks they ordered.

Check the seller's profile

Now go click on one seller that has no negative votes in order to see his profile. In his profile he might be mentioning how he acquire his subscribers, if you read something you don't like then find another seller.

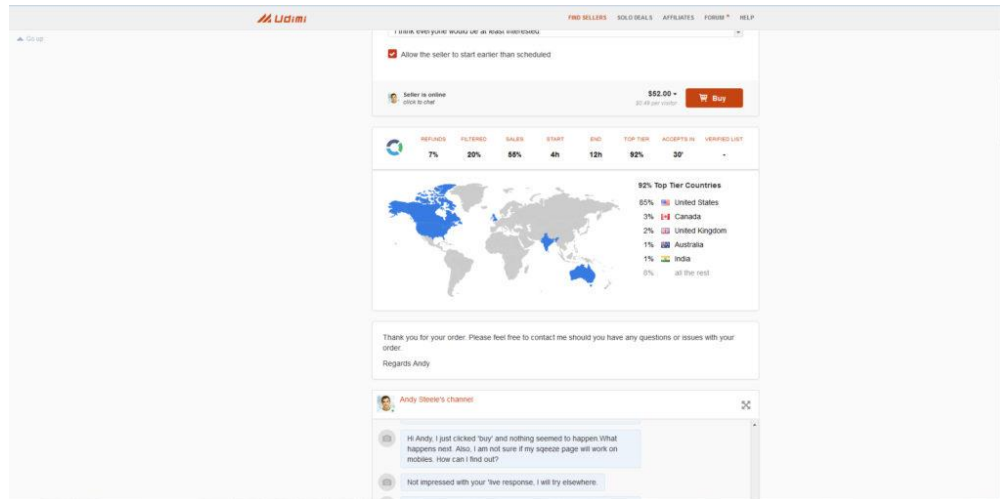

See from what countries his subscribers are from

If you want to learn what nationalities the subscribers of his email list have, then go can see that very easily when you scroll down (in his profile).

The last thing you do is to check the seller's comments

Most of the comments will be at least positive since we are checking the profile of a seller with only positive votes. The thing that you can see from the comments is if the seller over-delivered. If several people got more clicks than they have ordered then this is positive.

Buy a few clicks first

All you need to have is the link to your funnel and a good seller. I recommend you start off with 100 clicks and followup with some emails. I won't bore you with how to write emails. If you are satisfied order more clicks the next time.

The main thing you want to pay attention to now is the "currently trialing" section in your ClickFunnels affiliate dashboard:

As long as you keep getting new trials you're good! The cash is bound to come in! Just be patient as it can sometimes take weeks for some people to convert! The platform has promotions all around and once people sign up under your referral link you'll be earning commissions from just about everything the platform has to offer, from books, seminars, and more!

Final Thoughts

Look, I'm not going to sugar coat this, if you came this far you know I love ClickFunnels and Udimi but that's because it's the perfect business solution for me. Is it the right solution for you? Well, that depends on your goal.

If you just want to make simple landing pages and pay extra for an email service then maybe LeadPages is right for you. If you want an all in one online business solution the [ClickFunnel](#) with [Udimi](#) is right for you.

At the end of the day, it comes down to money right? Sure ClickFunnels is a bit more expensive but it has WAY MORE that comes with it plus you don't need to pay extra for any 3rd party apps.

It's a pure investment because it will be making you back that money anyway. I also love the fact that it was created by someone who was a real business owner before he even created it. He did the grind like we did and he created the perfect software to make his life easier now he is offering it to us.

Russell (the founder of ClickFunnels) also uploads tons of Facebook live videos in his [Facebook Group](#) so it just feels different being with them...

Feels like family I guess.... feels good. Trying to start a business? Need to collect leads? need to create a webinar funnel? If so then hands down my recommendation would be ClickFunnels.

That's not to say that I think LeadPages is not right for you because it might be but at the end of the day ClickFunnels is an overall complete package.
